 LEPL Service Agency of Ministry of Internal Affairs of Georgia;
 Georgian State Electric System, LTD;
 Georgian Gas Transportation Company, LTD.

Notice: The discrepancy between the totals and the sum in some cases can be explained by using rounded data.

Information Note

The electronic Database of Customs Declarations (DBCD) is the main administrative information source of external merchandise trade transactions. National Statistics office of Georgia (Geostat) receives DBCD from the Revenue Service of Ministry of Finance of Georgia on a monthly basis. Geostat produces External Merchandise Trade Statistics in line with the international methodology/standards.

It is well-known fact that Georgia launches hepatitis C elimination program since 2015. Program recipients are granted by the medicaments free of charge. Customs value of those medicaments are based on expertise valuation.

IMF technical assistance (TA) mission on external sector statistics (ESS) was conducted in Georgia at the end of 2016. The purpose of the mission was to Geostat and the National Bank of Georgia (NBG) in strengthening the and dissemination of ESS.

One of the priority actions recommended by the mission was to adjust data on value of imported hepatitis C medicines based on information received from counterparts. This will ensure consistency between External Merchandise Trade Statistics and Balance of Payments data.

According to the provided recommendations Geostat adjusted value of import of C hepatitis medicaments on the basis of invoice price received from the Revenue Service. Adjustments covered 2015-2016 years period since starting hepatitis C elimination program. Recalculation of the total import, merchandise trade turnover and trade balance was made accordingly.

Adjustment of data will ensure comparability of statistical data at the international level. Adjustments were implemented according to the Statistical Data Revision Policy of Geostat.
