

Rapid Estimates of Economic Growth May 2013

The estimated real Gross Domestic Product (GDP) growth rate amounted to 0.0 percent y-o-y in May 2013. The real GDP growth equaled 2.2 percent in April-May 2013.

The real GDP growth 2013 equaled 2.3 percent in January-May.

The Geostat produces monthly rapid estimations of real GDP growth using administrative data on VAT taxpayers' turnover, fiscal and monetary statistics. The compilation of rapid estimates is an internationally adopted practice to obtain preliminary monthly growth of real GDP. For those sectors, where preliminary monthly data do not exist (e.g. agriculture, non-observed economy etc.), the estimations are based on the data for previous periods. Therefore, the actual quarterly real GDP growth may significantly differ from monthly rapid estimates.

Furthermore, the data on VAT taxpayers' turnover for the previous months might be updated on a monthly basis, implying corresponding adjustments of real GDP growth estimates.

Monthly Economic Statistics

May 2013

Indicators of price statistics

Indicator	Y-o-Y	M-o-M
