- 1578 child's blood was extracted for lead test, which is almost 60 percent of eligible amount.
- 3% of children under 17 years live with neither of the biological parents.
- Nearly one third of households (32%) is headed by a female.
- The average family size is 3.4. One third of the population (34%) lives in Tbilisi.
- The 96% of children under 17 years has health insurance.
- More than 93% of population aged 15-49 has health insurance.

The Georgia Multiple Indicator Cluster Survey (MICS) was carried out in 2018 by the National Statistics Office of Georgia as part of the global MICS programme. Technical support was provided by the United Nations Children's Fund (UNICEF). UNICEF, NCDC, USAID, WB, UNFPA, SIDA, AFD, SCD, ISS, UNDP and WHO provided financial support.

The objective of this snapshot is to disseminate selected findings from the Georgia MICS 2018 related to Survey and Sample Characteristics. Data from this snapshot can be found in table SR. 1.1, SR. 5.1W, SR.5.1M, SR.5.2, and SR.5.3 in the Survey Findings Report.

Further statistical snapshots and the Survey Findings Report for this and other surveys are available on mics.unicef.org/surveys.
