2.2	Metadata last posted	2021 June 15
2.3	Metadata last update	2021 June 8
3	Statistical presentation	
		The following basic indicators are published within the statistical research (annual):
	Data description	1. Number of Employees in grain storage elevators;
		2. Number of consumers of grain storage elevators;
3.1		3. Expenses incurred by grain storage elevators;
		4. Products stored in grain storage elevators;
		5. Average annual load of grain storage elevator;
		6. The volume and value of the products sold by the grain storage elevators.
3.2	Classification system	Within the survey is considered enterprises whose economic activity is related to warehousing.
3.3	Sector coverage	The survey is carried out within the list provided by the Ministry of Environment and Agriculture.
	Statistical concepts and definitions	Active Enterprise – All non-financial corporations that were active during the reporting period.
3.4		Income – Incomes of grain storage elevators, without VAT and excise.
		Costs – Expenses incurred by the grain storage elevators.

	Concept Name	Representation
3.5		The Enterprise – the economic unit that produces goods or services, independently makes economic decisions about
	Statistical unit	distribution of their resources (holds a definite degree of freedom in making decision). The enterprise carries out one or more
		of the economic activities according to one or more locations. The enterprise may be individual (physical) or legal unit.
3.6	Statistical population	All active enterprises presented in the list provided by the Ministry of Environment and Agriculture.
3.7	Reference area	The entire territory of Georgia, except for the occupied regions.
3.8	Time coverage	From 2015.
3.9	Base period	-
4	Unit of measure	Tons, Gel.
5	Reference period	Year.

12.3	Completeness	The data is relevant to an international standard.
13	Accuracy and reliability	
13.1	Overall accuracy	The processed data is compared to the relevant data of the last period. In some cases, data is verified with the representatives of the enterprises.
13.2	Sampling error	The survey is held with entire coverage.
13.3	Non-sampling error	For minimizing non-sampling errors, data is verified with the representatives of the enterprises.
14	Timeliness and punctuality	
14.1	Timeliness	The data are published on the 15 June of the next year of reporting period.
14.2	Punctuality	The data is published according to the date specified in the statistical work program. There has not been any violation of publication dates.
15	Coherence and comparability	
15.1	Comparability – geographical	The methodology used in scope of the survey is comparable on regional and international level.
15.2	Comparability – over time	The data is comparable over time.
15.3	Coherence – cross domain	The data is coherent.
	Coherence – internal	The data is coherent.
16	Cost and burden	The annual budget of survey of cold storages facilities, livestock slaughterhouses and elevators is 2 550 GEL. Interviewer compensation for one filled questionnaire is 8.50 GEL.
17	Data revision	
17.1	Data revision – policy	Statistical data revision policy is available on the website of Geostat: https://www.geostat.ge/media/20863/Revision-policy Geostat Eng.pdf
17.2	Data revision – practice	There is no planned revision of the data. Unplanned revision (in order to specify the data) has not taken place in practice.
18	Statistical processing	
18.1	Source data	Online questionnaire filled by the respondent.
18.2	Frequency of data collection	Annually.
18.3	Data collection	Data collection is done through online questionnaires.
18.4	Data validation	Data validation is primarily a program based on arithmetic control in the database. Secondary control is carried out by the field staff (interviewers) and staffs of business statistics division.
18.5	Data compilation	The data of individual objects are summarized in the program.
18.6	Adjustment	Not used.
19	Comment	-
