## CONSTRUCTION COST INDEX IN GEORGIA

III QUARTER OF 2021

In the third quarter of 2021 the Construction Cost Index (CCI) increased by 1.8 percent compared to the previous quarter. The change was mainly due to a 2.7 percent increase in the prices for construction materials, which contributed 1.59 percentage points to the total index change.

Compared to the third quarter of 2020 the CCI increased by 14.1 percent. The latter was largely caused by the 19.6 percent increase in the prices for construction materials, which contributed 11.07 percentage points to the annual index change.

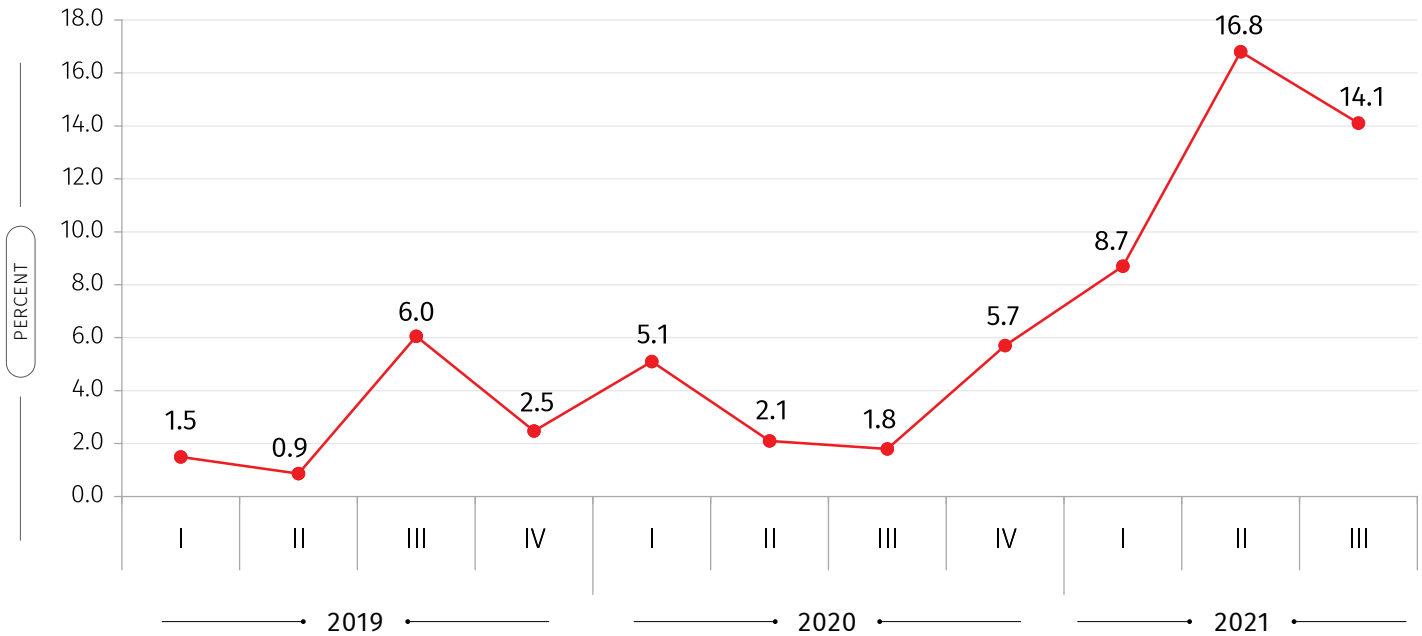

The following table shows the CCI for the third quarter of 2021, compared to the previous quarter and the corresponding quarter of the preceding year, as well as the contributions of cost categories to the total index.
