The purpose of the Non-Observed Economics Statistical Survey in Human Health Services is to determine the final expenditures (in monetary and non-monetary forms) on Human Health Services spent in 2020. It excludes intermediate expenditures spent on entrepreneurial activities.

The survey consists of two parts:

Section 1 - Expenditures on health care services - include expenditures on health care services by type of service. Health care services include services provided by hospitals, medical, surgical, psychiatric, dental and other institutions, as well as healthcare activities, which are provided outside of hospitals by practicing physicians and/or by physicians, which are caring with non-traditional/alternative methods.

Section 2 - Expenditures on medicines and medical instruments

2.1 - Expenses incurred for the purchase of medicines and other pharmaceutical products - include expenses for the purchase of medicines and other pharmaceutical products;

2.2 - Expenditures on medical and dental instruments - includes costs, according to the medical and dental instruments. Medical and dental instruments include surgical instruments, dental, orthodontic instruments, syringes, needles, catheters, ophthalmic, and other medical instruments/equipment.

To the interviewer: The survey does not include households that did not have expenses on Human Health Services in 2020 on their own or by others from the funding sources of the questionnaire
