## GENDER EQUALITY

Gender equality refers to the equal rights, responsibilities and opportunities of women and men, and girls and boys. Equality does not mean that women and men will become the same; but that women's and men's rights, responsibilities, and opportunities will not depend on whether they are born male or female. Gender equality implies that the interests, needs and priorities of both women and men are taken into consideration, recognizing the diversity of different groups of women and men.<sup>1)</sup>

Article 11 of the Constitution of Georgia (including amendments approved by the Parliament in 2017) and the Law of Georgia on Gender Equality (approved by the Parliament in 2010) provide women and men with equal rights and opportunities and recognize the need for specific actions to achieve equality between women and men and eliminate inequality in Georgia.

According to the 2006 State Concept on Gender Equality, equality between women and men is seen as a human rights issue and refers to the equal representation of women and men, equal rights and participation in every aspect of public and private life. In addition, gender equality is a precondition for, and indicator of, sustainable people-centred development.<sup>2)</sup>

Achieving gender equality and empowering women and girls is a core component of the United Nations 2030 Agenda for Sustainable Development. The sex-disaggregated statistics presented in this report are not only an important indicator of Georgia's development, but also a reflection of the situation regarding women and men in the country.

## THE NEED FOR GENDER STATISTICS

Gender statistics are defined as statistics that adequately reflect the differences and inequalities in the situations of women and men in all areas of life. It is one of the key instruments to reflect and integrate the needs and priorities of women and men, and girls and boys in policy development and to ensure equal distribution of its positive outcomes for everyone.

Gender statistics aim to produce adequate data by using advanced, gender-sensitive methodology to measure and assess the actual social status of women and men and the overall state of gender equality. The improvement of content, methods, classifications and measurements in gender equality statistics is of utmost importance for gender equality professionals, representatives of legislative bodies, state authorities and civil society.

The Government of Georgia began the nationalization of the Sustainable Development Goals (SDGs) in 2015. The Government identified the priority goals, targets and indicators through the adaptation of the 2030 Agenda for Sustainable Development. By implementing the SDG national agenda, the situation regarding gender equality in the country will be significantly improved by 2030. Specifically, Goal 5 with its relevant objectives and indicators, focuses on achieving gender equality and empowering all women and girls. Other objectives and indicators related to gender equality are also defined in other SDGs, and it is important to implement and monitor them. The connection between the national gender statistics and the SDGs are reflected in this publication.

## COMPLETED ACTIVITIES IN GEORGIA

- 1994 Accession of the Convention on the Elimination of All Forms of Discrimination against Women (CEDAW) without reservations.
- 1995 Georgian Delegation took part in the Fourth World Conference on Women and the adoption of the Beijing Declaration and Platform for Action (BPfA).
- 1999 Decree No. 511 about the Measures on Strengthening the Protection of Human Rights of Women in Georgia.
- Significant progress was made by the Government of Georgia in ensuring the proactive implementation of the gender equality commitments laid out by CEDAW, the BPfA, the MDGs and the International Conference on Population Development (ICPD) Programme of Action, in particular in (1) designing national legislation and policy frameworks to guarantee women's human rights; (2) preventing and responding to violence against women; and (3) addressing women's issues in conflict. Some attempts were also made to put in place measures for (4) increasing the number of women in power and decision-making.
- 2004 Gender Equality Advisory Council in the Parliament established.
- The nationalization of the Millennium Development Goals (MDGs) – MDG 3, promotion of gender equality and empowerment of women – was adjusted to the Georgian context through two key targets: (1) ensuring gender equality in employment; and (2) ensuring equal access to activity in the political domain and at all levels of management. Progress towards the implementation of the MDGs was uneven, and much remained to be achieved especially in the areas of women's political and economic empowerment.
- 2004
- 2005 Governmental ad-hoc Commission for Gender Equality (GCGE) established.
- 2006 State Concept on Gender Equality adopted by the Parliament.
- 2006 Law of Georgia on Combating Human Trafficking adopted.
- 2006 Law of Georgia on the Elimination of Domestic Violence, Protection and Assistance to the Victims of Domestic Violence adopted.
- 2010 Law of Georgia on Gender Equality adopted.
- 2012 Georgia criminalizing the offence of domestic violence.

- 2013 Prime Minister's Assistant on Human Rights and Gender Equality Issues appointed.
- 2013 Gender Equality Department established as a standing unit in the structure of the Public Defender's Office (PDO).
- 2013 PDO developed its Gender Equality Action Plan for the 2013-2015 period as well as a strategy for mainstreaming gender into the PDO's work.
- 2014 Law of Georgia on the Elimination of All Forms of Discrimination adopted.
- 2014 Council of Europe Convention on preventing and combating violence against women and domestic violence (Istanbul Convention).
- 2014 The first wave of legal amendments to harmonize national legislation with Istanbul Convention adopted.
- 2015 Ministry of Defence adopted its internal Gender Equality Strategy; gender focal points appointed.
- 2016 Inter-Agency Council on Human Rights has been created.
- 2017 The Council of Europe Convention on Preventing and Combating Violence against Women and Domestic Violence ratified.
- 2017 The Inter-Agency Commission on Gender Equality, Violence against Women and Domestic Violence established and operational.
- 2018 Human Rights Department established as a standing unit in the structure of the Ministry of Internal Affairs.
- 2018 2018-2020 National Action Plan of Georgia for Implementation of the UN Security Council Resolutions on Women, Peace and Security adopted.
- 2019 Georgia elected a woman president.
- 2019 Georgia submitted its Beijing Declaration and Platform for Action +25 National Review Report.
- 2020 Georgia has submitted the first report on the implementation of the Convention on the Prevention and Suppression of Violence against Women and Domestic Violence to the GREVIO Committee of the Council of Europe.
- 2020 Georgia submitted the sixth periodic report to the UN CEDAW Committee.
- 2020 As a result of legislative changes to the Election Code, quotas were introduced for the first time in Georgia to increase women's political involvement.

- 2021 Equal Pay International Coalition (EPIC).
- 2021 GeoStat approved the Strategy for Gender Statistics.
- 2022 The action plan and communication strategy of the Permanent Parliamentary Gender Equality Council for 2022-2024 were approved.
- 2022 The assessment mechanism of the Parliament's Gender Sensitivity was approved and the relevant report was prepared.
- 2022 National Action Plan on Combating Violence against Women and Domestic Violence and Measures to be Implemented for the Protection of Victims (survivors) for 2022- 2024 was approved.
- 2022 The rule on the determination of compensation amount and issuing of compensation to the victims of violence against women and/or domestic violence was approved.
- 2022 National Action Plan for the implementation of the UN Security Council resolutions on Women, Peace, and Security for 2022-2024 was approved.
- 2022 The "Pilot Program for Women" was approved.
- 2022 Gender Equality Strategy of the Prosecutor's Office of Georgia for 2022-2027 and Gender Equality Action Plan for 2022 – 2024 was approved.
- 2023 State Concept on Economic Empowerment of Women was approved.
- 2023 Gender Equality Action Plan for 2023-2023 of the Ministry of Deference of Georgia was approved.
- 2023 The gender equality strategy and action plan of the Public Service Bureau was approved.
- 2023 The strategy of the Public Administration Reform for 2023-2024 and the Public Administration Reform Action Plan for 2023-2024 was approved.
- 2023 The 2024-2026 action plan for human rights protection of Georgia was approved.
- 2024 Amendments to the "Georgian Election Code" and the "On Political Union of Georgian Citizens" law were approved, according to which the mechanism of mandatory gender quotas and financial incentives for political parties was abolished.

## READER'S GUIDE

“Women and Men in Georgia” is the sixteenth statistical publication dedicated to gender equality issues.

The statistical data reflects the key indicators of gender equality in 2023 in Georgia. Percentage distribution and sex-disaggregation of statistical data are performed as follows:

- Percentage distribution – ratios for each sex by a certain characteristic; e.g. women students in public and private higher education institutions
- Sex-disaggregation within a group – for a certain characteristic by sex; e.g. the proportion of women and men students in public and private higher education institutions

The publication aims to raise public awareness of gender-related issues and to support the development of targeted state policies in the field of gender equality.

The data are retrieved from the surveys conducted by the National Statistics Office of Georgia and other administrative sources.

The team of authors would greatly appreciate comments and suggestions on the format and content of this publication.

WOMEN AND MEN  
IN GEORGIA

---

# POPULATION

From the first years of regaining independence in the early 1990s, Georgia's population experienced profound changes. The total size of the population shrank significantly as a result of large-scale migration processes. A sharp decline in births and deaths followed.

Currently, the population of Georgia is aging: between 2002 and 2024, the share of women aged 65 and above among the total number of women increased from 15.3 per cent to 19.4 per cent, while the same figure for men increased from 10.9 per cent to 12.6 per cent.

As in most countries, more boys than girls are born in Georgia, with this trend remaining stable over the years. The share of newborn boys account for 52.2 per cent of births, meaning men exceed women until around age 30. However, women above the age of 30 in Georgia exceed men in number due to men's higher mortality. International studies show that men's higher mortality rates are behavioural in nature: gender differences in alcohol consumption, smoking and participation in risk-related activities such as driving mean that women have a longer life expectancy compared to men.

Thus, it is not surprising that women in Georgia have a higher life expectancy than men, with the current figures standing at 79 years for women and 71 years for men.

As mentioned, the total share of girls and boys born has remained stable in recent years, resulting in a sex ratio of approximately 109.4 boys per 100 girls born. Notably, though, that there was a dramatic decline in the sex ratio of the third child: standing at a high of 141 in 2006, this number continuously declined to 114 in 2023, pointing to positive developments related to the issue of possible gender-biased sex selection.

Migration continues to play a major role in Georgia's demographics. Mobility among men is traditionally higher: they constituted 58 per cent of immigrants and 56 percent of emigrants in 2023. The average age of registered marriages showed a steady increase in the past 10 years: on average, women married at 27.4 years old in 2013 and at 31.9 years old in 2023. For men, the analogous increase was less pronounced, standing at 30.9 and 34.4 years old respectively.

# HEALTH CARE

Significant public investments in health care over the past 15 years, including the introduction of universal health insurance, led to a drastic improvement in a number of key health indicators. Compared to the early 2000s, the infant mortality rate (the number of deceased children per 1 000 live births) dropped four times to equal 8.5 for boys and 7.8 for girls in 2023.

Similar trends are found for under-5 mortality rates, which have declined 1.4 times for girls and 1.9 times decline for boys in the past 10 years.

On the other hand, it is estimated that in the past 10 years, the more-than-tripled public health expenditures and the introduction of universal health insurance led to an increase in the number of patient visits by at least 50 per cent, implying higher registered numbers of different types of communicable and non-communicable diseases. The analysis shows that new cases of tuberculosis, HIV infection and psychological disorders among men largely exceed those among women, while there are more cases of newly diagnosed malignant neoplasms among women compared to men.

The analysis of causes of deaths indicates that the diseases of the circulatory system continue to dominate the overall number of cases, constituting 42 per cent of all deaths among women and 38 per cent of all deaths among men.

WOMEN AND MEN  
IN GEORGIA

---

# EDUCATION AND SPORTS

Access to education at every level plays a vital role for any country's economic development as well as women's empowerment.

In Georgia, the share of boys and girls of the respective age entering primary school – net primary school enrolment – has remained at a fairly high level.

Boys are more likely to quit general schooling after completing compulsory basic education. Given that the numbers of boys and girls pursuing vocational education are practically equal, this fact indicates that boys are more inclined to enter the labour market.

There are approximately 15.5 thousand boys and girls studying in vocational schools. Girls tend to dominate programmes in the health, social welfare, business, administration and law, service. while boys represent the vast majority of students in engineering, manufacturing, construction and ICT specializations.

Women have higher enrolment in higher education favouring programmes in the business and law, arts and humanities, science. Men tend to dominate programmes in engineering, manufacturing and construction. A similar sex distribution remains for doctoral students.

General education teachers represent the largest category of employees in the education sector. The number of female school teachers amounted to approximately 56,000 in 2023, exceeding the number of male school teachers by 7 times. Women outnumber men in vocational and higher education as well, although these differences are less pronounced.

# SOCIAL SECURITY

The types of social security in Georgia can be divided into two broad groups: status-based and means-tested. The former primarily includes pension and social packages, as well as support for internally displaced persons (IDPs), while the major provider of means-tested social security is the Targeted Social Assistance programme.

In terms of scope, pensions represent the largest category of social security, covering approximately 23 per cent of the total population. Women are eligible to receive a pension benefit (in retirement) from the age of 60, compared to 65 for men. This fact, along with an almost eight-year gender gap in life expectancy in favour of women, results in the number of retired women exceeding that of retired men almost 2.5 times. On the other hand, male beneficiaries of social packages almost twice outnumber female beneficiaries due to a larger number of men among persons with disabilities, receivers of state compensation and war veterans.

Women also represent the majority of beneficiaries of the Targeted Social Assistance programme. Similar to the case of the retirement pension, this fact is explained by demographic factors, as the vulnerable elderly population includes more women.

# LABOUR FORCE, EARNING

Participation in the labour market, which broadly means being in employment or actively searching for work, represents one of the key factors for promoting gender equality. The corresponding statistical indicator – the labour participation rate – over the past 10 years stood at about 62 per cent to 67 per cent for men and 40 per cent to 46 per cent for women, pointing to significant gender differences in entering the labour market.

In line with the above, traditionally lower unemployment rates for females vis-à-vis males in Georgia may look confusing. However, the explanation is simple: unemployed persons are defined as those who actively look for work and are willing to start working almost immediately. Since women are considerably less active in the labour market, the share of unemployed women turns out to be low as well.

Gender differences in wages remain significant, as women earn less than two-thirds of men's average monthly salary. In 2023, the ratio of women's wages to men's wages was 67.9 per cent, which is 0.4 percentage points lower than the 2022 data.

# LIVING CONDITIONS

The information on the population's living conditions is traditionally derived from household surveys. Since a household is usually surveyed as a single entity, this creates certain difficulties for gender analysis. For this purpose, data analysis is usually performed according to the sex of the head of the household.

In Georgia, a man is traditionally considered to be the head of the household. Accordingly, the share of male-headed households exceeds 60 percent. However, this figure would be significantly higher if single-person households and households where only one parent lives were excluded from the analysis.

The data on the type of ownership of dwellings, household total incomes and expenditures as well as poverty indicators do not reveal gender differences among male- and female-headed households. However, gender differences are revealed through an analysis of certain categories of household incomes and expenditures. Incomes from selling agricultural production and property disposal are higher for households where the head is male, while incomes from property leasing and money received as a gift are higher for households where the head is female. In case of expenditures, expenses on transport and agriculture are higher for households where the head is male, while expenses on housing, water, electricity, gas and other fuels and education are higher for households where the head is female.

# INFORMATION AND COMMUNICATION TECHNOLOGY

The importance of Information and Communication Technology (ICT) in everyday life continues to grow, and this tendency was strengthened by the global increase in ICT use in recent years. The penetration of ICT in education, e-commerce, business and social communication also makes it an indispensable tool for providing equal opportunities to women and men.

In Georgia the use of ICT has been on the uptrend over the years. It can be asserted that ICT is one of the few areas in which gender-disaggregated indicators are very similar. Women and men equally possess computers and mobile phones, their access to the internet is very much alike across age groups.

While detailed data on the use of ICT by the population are provided in the tables below, it can be noted that the apparent absence of gender differences in ICT area provides an optimistic outlook into the future.

# BUSINESS STATISTICS

Gender analysis of the business sector touches upon two primary factors of the production process: labour (hired employees) and capital (entrepreneurs and business owners).

As previously shown in the chapter on the labour market, women are less likely to be employed, and their salary is lower in almost every economic sector. In particular, the numbers of women and men working in the business sector equalled 357 thousand and 467 thousand persons respectively, whereas women's average wages constituted 68 per cent of men's average wages.

The most recent data show that the number of men founding businesses is almost twice as high as the number of women in the same category. If we look at the economic sectors, a relatively small number of women business owners are found in the mining industry, construction, transport and warehousing, and agriculture. On the other hand, the number of female owners is much higher than the number of male owners in areas of activity such as education, health and social services and other services.

# AGRICULTURE

The main source of official statistics on the agricultural sector is a quarterly survey of agricultural holdings, allowing to receive the data on family holdings and agricultural enterprises. In both cases, a head of holding is considered to be key person, which in terms of family holdings is called the holder, while for enterprises - the head of the holding. Regarding the gender issues, it is important to analyze the distribution of agricultural holdings and assets operated by them by the sex of the holder and head of holding. Over the last few years, the share of the agricultural holdings whose head is women is steadily around 32 percent, while the share of land operated by those agricultural holdings in the whole land operated by all agricultural holdings varies within 18-21 percent. It allows us to conclude that, the heads of the agricultural holdings that operate large land are mainly men. The above-mentioned difference is reflected well in the average annual profit. In 2020, the annual average profit of holdings whose head was man exceeded by 51 percent for small holdings and by 43 percent for medium and large holdings <sup>1)</sup>, than the holdings whose head was women.

It is important to discuss the workers in agricultural holdings in terms of sex. For example, in 2022, the average amount of men working in agricultural holdings (arithmetical average of absolute values of workers in four quarters) exceeds by 10 percent the same indicator for women workers, while the number of man-days worked by the men workers during the year exceeds by 3 percent that the man-days worked by women workers. Based on mentioned, we can conclude that the women on average work more than men. One of the reasons for this can be attributed to the intensive involvement of women in animal husbandry, which means feeding cattle/poultry or milking cattle during a whole year. It should be noted, that the similar trend is observed in family holdings, while for enterprises, where the work schedule is more fixed and therefore characterized by less variation, the situation is different. In 2022, 58 percent more men than women are employed in agricultural enterprises, and the number of man-days worked by them exceeds the number of man-days worked by women by 82 percent.

---

<sup>1)</sup> The size of the farm is determined by the following three parameters - land area, number of livestock and cost of produced products. A farm is small if all three parameters fall within the lower 40% of the cumulative distribution. In other cases, the farm is considered a medium or large farm.

# CRIME

Men are much more likely to commit a crime worldwide, and this pattern is extremely pronounced in Georgia. For all types of major crimes, from homicides to traffic violations, male perpetrators account for more than 90 per cent of all cases.

Over the last 10 years, the statistics of victims of criminal offenses, by gender, have changed substantially. In 2014-2023, the majority of victims were men with a share of about 53 per cent. According to official data, the share of women victims has been decreasing for the last five years, but in 2023 it amounted to 50 per cent.

The fact that more women than men were registered as victims of crime in past years is largely related to the issue of domestic violence, whose main victims are women. Over the past decade, a vast range of measures to combat domestic violence has been adopted in Georgia. These efforts resulted in a tremendous increase in social awareness on the issue: As a result, from 4,096 registered victims of domestic violence in 2017, in 2023 this indicator exceeded 7 773

While surveys on violence against women show that registered cases represent only a small part of all cases of domestic violence, the significant rise in the registered number of complaints and issued protective orders can be regarded as a positive development in this area.

WOMEN AND MEN  
IN GEORGIA

---

# INFLUENCE AND POWER

Gender differences across the three branches of government in Georgia remain quite uneven. In two branches of power – the executive and legislative – the gender power gap is relatively moderate. Thus, in the top positions of the executive branch, the share of women varies from 21 per cent among ambassadors to 17 per cent among government ministers. The judicial branch includes around 55 per cent of women as general court judges.

However, the largest gender power gap has been traditionally observed in the legislative branch, both at the national and at the municipal levels. The share of women members of the Parliament of Georgia constituted 19 per cent in 2023.

The reduction in the gender power gap represented the primary objective of recent amendments to the Election Code. In line with the introduced gender quotas, the share of female MPs will increase, while the municipal assemblies will have an even larger proportion of women.

## TERMS AND DEFINITIONS

**Abortion** – artificial termination of a pregnancy that is performed (a) deliberately up to 12 weeks of pregnancy (based on the woman's request); or (b) in accordance with medical and social indications, between 12 and 22 weeks of pregnancy.

**Adolescent birth rate** - The number of births to women aged 15-19 per 1,000 women in that age group.

**Adoption of a child** – defined as a deliberate refusal to the parental right of a child offered for adoption and transfer of a child to the adoptive parent(s) for care and upbringing. Adoption refers to a relationship between an adoptive parent and an adoptee, similar to the relationship between a parent and a child, established under the law. The necessary precondition for the adoption of a child is the consent of the parent(s), which they shall submit to a guardianship and custodianship local authority. Adoption of an orphan or abandoned child is permissible without parental consent. The consent of the parent(s) is also not required if they were declared as missing or dead by a court.

**Age-specific fertility rate** – number of births to women in a particular age group, divided by the number of women in that age group. It is expressed as the average number of live births per 1,000 women in a specific age group.

**Agricultural enterprise** – A holding operated by legal entity: limited liability company, general partnership, limited partnership, joint stock company, cooperative, etc.

**Agricultural holding (holding)** – An economic unit engaged in agricultural production under single management without regard to its size and legal status. There are two types of agricultural holding: family holding and agricultural enterprise.

**Average nominal monthly wages** – calculated by dividing the total wage fund by the average number of hired employees who received the wages in the respective period (quarter, year). The number of part-time employees is recalculated into full-time equivalents.

**Business activity** – a lawful and repeated activity that is oriented to earn a profit. It is carried out independently and is well organized.

**Causes of death** – illnesses, pathological or physiological conditions, or injuries that directly cause or stimulate death; accidents or coercion leading to death.

**Civil service** is a part of the state service present across all three branches of government: legislative, executive, and judicial, as well as in local self-government bodies and legal entities established under public law.

**Computer user** – a person who used a computer (desktop, portable computer (laptop, notebook, netbook), tablet) independently at any place (at home, at work or at another location) at least once in the reference period.

**Divorce (termination of marriage)** – a fact of legal significance that is one of the grounds for the termination of a marriage between spouses and is confirmed by the relevant individual administrative-legal act.

**Dwelling unit** – refers to the structure in which a household lives and on the plot of land on which the unit is built. A dwelling unit is also used entirely or primarily as a residence, including any associated structures such as a garage.

**Emigrant** – A person, recorded when crossing the National border, who left the country and has cumulated a minimum of 183 days of residence outside the country during the twelve following months, and who was usual resident of the country when leaving the country, which means that he spent at least a cumulate duration of 183 days of residence inside the country during the twelve months before leaving the country.

**Employed** – a person aged 15 years and older, who during the reference period (7 days preceding the interview) worked for at least one hour for pay or profit or was temporarily absent from the job due to holiday, illness, maternity leave, technical, economic or other similar reasons.

**Employees** – a person aged 15 years and older, who during the reference period performed a certain work for at least one hour for wage or salary, in cash or in kind, or a person who has a job but was temporarily absent due to a holiday, illness, technical, economic or other similar reasons.

**Employment rate** expresses the number of persons who are employed as a percent of the relevant aged population.

**Enterprise** – an economic entity that produces goods or renders services and independently makes economic decisions on the distribution of its own resources (i.e. possesses a certain degree of freedom on decision-making). An enterprise carries out one or several kinds of activities in one or several places. An enterprise can be individual (physical) or a legal person. **Enterprises are grouped by size:** large, medium and small. A **large-sized enterprise** is an enterprise where the average annual number of employed exceeds 249 persons or the volume of average annual turnover exceeds GEL 60 million. **Medium-sized enterprises** are all enterprises of organizational-legal form where the average annual number of employed ranges from 50 to 250 persons or the average annual turnover ranges from GEL 12 million to GEL 60 million. **Small-sized enterprises** are all enterprises of organizational-legal form where the average annual number of employed does not exceed 50 persons and the average annual turnover is under GEL 12 million.

**Family member** – a person who has the rights and responsibilities under a family relationship. Property, inheritance, housing and other rights, as well as obligations of a family member, are regulated by the national legislation.

**Family holding** - A holding operated by household.

**First stage of higher education** – V-VII levels of education as defined by the International Standard Classification of Education (ISCED); programmes designed to provide

intermediate and advanced academic and/or professional knowledge after secondary education (i.e. professional programmes, bachelor's programmes and master's programmes).

**Hours actually worked** includes time that during the reference period (7 days preceding the interview) persons in employment spend directly on, and in relation to, productive activities; down time; and resting time.

**Gender** – refers to the roles, behaviours, activities and attributes that a given society at a given time considers appropriate for men and women. In addition to the social attributes and opportunities associated with being male and female and the relationships between women and men and girls and boys, gender also refers to the relations between women and those between men. These attributes, opportunities and relationships are socially constructed and are learned through socialization processes. They are context/time-specific and changeable. Gender determines what is expected, allowed and valued in a woman or a man in a given context. In most societies, there are differences and inequalities between women and men in responsibilities assigned, activities undertaken, access to and control over resources, and decision-making opportunities. Gender is part of the broader sociocultural context, as are other important criteria for sociocultural analysis including class, race, poverty level, ethnic group, sexual orientation, age, etc.

**General education institution/school** – a legal entity under public law or an entrepreneurial or non-entrepreneurial (non-commercial) legal entity under private law, authorized in the manner prescribed by the Minister of Education and Science of Georgia that carries out general educational activities under the National Curriculum and completely covers at least one level of general education. The data include I-III levels of general education (primary, basic, secondary) as defined by the National Qualifications Framework in the field of general education.

**The gender pay gap** represents the difference between the average wages of men and women expressed as a percentage of the average wage of men. The gender pay gap that does not take into account demographic and job characteristics of the individuals is known as the **unadjusted** gender pay gap. Even if demographic (age, education, marital status, place of residence - region/type of settlement, etc.) and job characteristics (economic activity, occupation, etc.) are considered, there is still a difference between wages of men and women as measured by the **adjusted** gender wage gap. This difference is an indicator of gender inequality related to earnings.

**Global indicator framework for the Sustainable Development Goals** – UN General Assembly adopted the 2030 Agenda for Sustainable Development in September 2015. The 2030 Agenda was affirmed by resolution 70/1. The global indicator framework was later adopted by the General Assembly on 6 July 2017. The framework includes 17 goals and 232 indicators. The indicators included in this report are retrieved from the E/CN.3/2018/2 report<sup>1</sup>.

**Household** – a group of persons who observe the rules of common living and occupy a single dwelling and are connected by a shared budget (or a part thereof), as well as by

<sup>1</sup> Available at <https://undocs.org/E/CN.3/2018/2>.

relative or non-relative relationships. A household may consist of one person.

**Household Expenditures** - include all expenditures of the household and its members during the reference period. Total expenditures consist of cash consumption expenditures, non-cash expenditures, and cash non-consumption expenditures. Cash consumption expenditures includes expenditures on food, beverages, tobacco, clothes and footwear, household goods, healthcare, housing, water, electricity, gas and other fuels, transport, education and other consumption expenditures. Cash non-consumption expenditures includes expenditures on agriculture, transfers, saving and lending, property acquirement.

**Household Incomes** – include all incomes of the household and its members during the reference period. Total income (cash and non-cash inflows) consists of cash income and transfers, non-cash income and other cash inflows. Cash income and transfers includes income from wages, self-employment, selling agricultural production, leasing, deposit (interest), pensions, scholarships, assistances, remittances from abroad and money received as gift. Other cash inflows include income from property disposal, borrowing and dissaving.

**Immigrant** – A person, recorded when crossing the National border, who entered the country and has cumulated a minimum of 183 days of residence in the country during the twelve following months, and who was not usual resident of the country when entering the country, which means that he spent at least a cumulate duration of 183 days of residence outside the country during the twelve months before entering the country.

**Infant mortality rate** – the number of deaths per 1,000 live births of children under 1 year of age.

**Informal employment** in non-agricultural sector refers to all workers not covered or insufficiently covered by formal arrangements through their work (didn't pay income tax from remuneration; or/and employed didn't benefit from paid annual leave or /and employed didn't benefit from paid sick leave in case of illness; or/and employer didn't contribution to the pension fund ) or employed defined her status in employment as a contributing family worker or enterprises where they worked weren't registered.

**Intentional homicide** – an act intended to cause death to a person.

**Internet user** – a person who used the Internet independently at any place (at home, at work or at another location) at least once in the reference period via any device (mobile phone or smartphone, computer, etc.).

**Juvenile offenders** – a person who committed a crime between the ages of 14 and 17.

**Labour force** – is defined as the sum of employed and unemployed persons.

**Labour the force participation** rate expresses the labour force as a percent of the relevant aged population.

**Larceny** – unlawful taking of the personal property of another person or business.

**Life expectancy at birth** – the average number of years that a newborn could expect to live if he/she were to pass through life subject to the age-specific mortality rates of a given period.

**Live birth** – complete expulsion or extraction from its mother a product of conception, irrespective of the duration of the pregnancy, that after such separation breathes or shows any other evidence of life – e.g., beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscles – whether or not the umbilical cord has been cut or the placenta is attached. Each product of such a birth is considered to be live-born.

**Marriage** – a voluntary union of a woman and a man for the purpose of creating a family, registered in the territorial offices of the Public Service Development Agency, a legal entity operating under the Ministry of Justice of Georgia.

**Mean age of spouses** – Average age of persons when they get married for a given period, calculated as arithmetic mean of spouses' ages at marriage.

**Median age of population** – Age that divides the population in two parts of equal size, that is, there are as many persons with ages above the median as there are with ages below the median.

**Morbidity rate** – a measure obtained by dividing new cases of morbidity by the average annual size of the resident population.

**NEET rate** – the share of youth not in education, employment or training conveys the number of young persons aged 15-29 not in education, employment, or training as a percentage of the total youth population, aged 15-29 years.

**Number of medical doctors** – includes all medical doctors having a medical degree who, worked at medical and sanitary organizations, social security establishments, scientific/research institutions, medical staff-training institutions, health-care organizations, etc.

**Number of persons found guilty** – includes physical persons found guilty after conviction by a competent court.

**Outside the labour force** – a person aged 15 years and older, who during the reference period (7 days preceding the interview) was not employed and within the previous four weeks did not actively search for work and/or was not ready to start working within the next two weeks.

**Pension (old age)** – a monthly state disbursement to a certain category of citizens permanently residing on the territory of Georgia, as well as the citizens of foreign states who have been legally residing on the territory of Georgia for the past 10 years and the persons without citizenship, disbursed on the basis of reaching the retirement age, in order to provide them with minimum subsistence means.

**Perpetrator** – can be a family member who violates the constitutional rights and freedom of another family member through neglect and/or physical, psychological, sexual and/or economic forms of violence and/or coercion. A family member or any person who conducts gender-based violence against a woman either in public and/or in a private space, through neglect and/or physical, psychological, sexual and/or economic forms of violence and/or coercion is considered a perpetrator. A responsible person or any other person who violates the constitutional rights and freedom of a juvenile living together with him/her under the legal law through neglect and/or physical, psychological, sexual and/or economic forms of violence and/or coercion is considered to be a perpetrator.

**Prison population** – the total number of accused and convicted persons in the imprisonment and detention facilities.

**Private mixed ownership** (foreign physical and/or legal person) – partly domestic private owners, partly foreign private owners.

**Private ownership** (local physical and/or legal person) – economic entities in which more than 50 per cent of the equity is in the ownership of a private person.

**Professional Civil Servant** - a person appointed to a position listed in the staff structure of a public institution, whose primary duty is to exercise public authority and protect public interests. Professional civil servants constitute the core of the public service and are responsible for performing its primary functions.

**Rank** – Based on the scope of competence and levels of authority, civil servants are categorized into several ranks: **Rank I** corresponds to the senior management level and involves responsibility, competence, and authority to supervise and coordinate the overall direction of the public institution's activities; **Rank II** corresponds to the middle management level and involves responsibility, competence, and authority to supervise and coordinate sub-directions within the public institution's field of activity; **Rank III** corresponds to the senior specialist level and involves responsibility, competence, and authority to execute the functions of the directions or sub-directions within the public institution's field of activity; **Rank IV** corresponds to the junior specialist level and involves responsibility, competence, and authority, primarily for training, to carry out the functions of the directions or sub-directions within the public institution's field of activity.

**Relative poverty** – estimated for two population thresholds:

- Share of population under **60 per cent** of median consumption
- Share of population under **40 per cent** of median consumption

The two relative poverty thresholds are calculated according to the median of the population distribution by the total consumption (consumption expenditure).

- Median consumption – population distribution by total consumption is such a value that half (50 per cent) of the total population consumes less than it while the other half consumes more than it.

- Relative poverty indicators – estimated based on the total household consumption recalculated for the equalized adult with regard to the shared consumption (cohabitation) effect.

**Restrictive order** – an act issued by an authorized police officer that determines temporary measures for protecting a victim of domestic violence and that shall be submitted for approval to a court within 24 hours after its issuance. Non-fulfilment of the requirements under a restraining/protective order by the abuser shall result in legal liability under Georgian legislation.

**Robbery** – attack aimed at holding someone's property accompanied with a violent act hazardous to a life or a violent act dangerous to someone's health or intimidation by using such an act of violence.

**Second stage of higher education** – VIII level of education, as defined by the International Standard Classification of Education (ISCED); programmes designed primarily to lead to an advanced research qualification, usually concluding with the submission and defence of a substantive dissertation of publishable quality based on original research.

**Self-employed** – a person aged 15 years and older, who during the reference period worked for at least one hour for profit or was temporarily absent from the job.

**Sex (biological)** – the physical and biological characteristics that distinguish males and females.

**Sex ratio at birth** - The ratio shows the number of male births per 100 female births.

**Social package** – a monthly state disbursement to a certain category of Georgian citizens in the presence of relevant grounds set forth in the law.

**State ownership in the business sector** – economic entities in which more than 50 per cent of the equity is in the ownership of the State.

**Stillborn** - A fetus, whose death is prior to the complete expulsion or extraction from its mother, irrespective of the duration of pregnancy; the fetus does not breathe or show any other signs of life, such as beating of the heart, pulsation of the umbilical cord, or contraction of certain groups of skeletal muscles.

**Subsistence Allowance** – Pecuniary Social Assistance - each family, registered in the unified database, enjoys the right to receive the pecuniary assistance, if its rating score is less than the fixed minimum acceptable for the subsistence allowance average score.

**Suicide** – taking one's own life voluntarily and intentionally.

**Theft** – felonious taking and removing of personal property with the intent to deprive the rightful owner of it.

**Total fertility rate (TFR)** – the average number of live births per woman (usually aged

15-49). TFR represents the mean number of children that would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the fertility rates according to her age within a given year.

**Total size of the population** – the total number of usual residents in a given area at a given time. The size of the population is calculated as of 1 January considering natural increases and net migration.

**Trafficking (trade in persons)** – a crime that is the recruitment, harbouring, transportation, provision or obtaining of a person for the purpose of exploitation by the use of force, fraud or coercion. Exploitation may take many forms, including labour and sexual exploitation.

**Under-5 mortality rate** – The number of deaths per 1,000 live births of children under 5 year of age.

**Unemployed** – a person aged 15 years and older, who during the reference period (7 days preceding the interview), was not employed and within the previous four weeks actively searched for work and in case of success was ready to start work within the next two weeks.

**Unemployment rate** expresses the number of unemployed as a percent of the labour force.

**Victim of domestic violence** – a woman or any other family member whose constitutional rights and freedoms have been violated through neglect and/or physical, psychological, sexual and/or economic forms of violence and/or coercion and who was given the status of a victim of domestic violence by the relevant service of the Ministry of Internal Affairs and/or by a court and/or by a group tasked with determining the status of victims of domestic violence (victim identification group).
