

<b>Statistical Survey of Producer Prices for Warehousing and Storage Services Questionnaire N 06.2.8.1 (annual)</b>					
Type of warehousing/storage equipment	Type of the stored product	Measurement unit	Share (%)	Base price (GEL)	Comment

The table contains the following fields:

- ✓ **Type of warehousing and storage equipment** – type of equipment used for the storage of products (warehouse, refrigerator, container, etc.);
- ✓ **Type of the stored product** – top four product types stored (in terms of share in the total revenue received by the enterprise from the provision of the warehousing and storage services);
- ✓ **Measurement unit** – measurement unit of the stored product type (kilogram, ton, barrel, pound, cubic meter, etc.);
- ✓ **Share** – share of the revenue received from storing the indicated product types in the total revenue received by the enterprise from the provision of the warehousing and storage services;
- ✓ **Base price** – average monthly price of storing of the indicated product type in December of the previous year (GEL).
- ✓ **Comment** – other relevant information.
