Day	month	year

According to the “Law of Georgia on Official Statistics” 24th Article, point second, with the view of fulfilling its functions the Geostat shall be authorized to request and receive from administrative bodies, physical and legal persons all kinds of statistical data and other information, including confidential information and/or information containing personal data, in line with the “Law on Personal Data Protection”.

The information provided by you is confidential and protected by the “Law of Georgia on Official Statistics”. It is only used for calculating the general statistical indexes.

## Thank you for your cooperation!

## Rules for keeping the diary

- The aim of the Diary of Expenses is to keep the records on the household members' expenses on food and non-food goods and services during a week
- The diary should record household's all expenses during the indicated 7 days period
- The entry for each day should be done separately. Two pages are dedicated to per day notes
- Start recording the new page by indicating the day of a week, as it is shown in the example given below

Second day	Indicate the day of a week		
------------	----------------------------	--	--

- The table on the left page is for recording food purchased by you or harvested from your own land or received from somebody else for free and brought home
- The upper table of the right page is for recording any of your family members' expenses for catering outside
- The lower table of the right page is for recording the list of the non-food items bought by you or obtained for free, also the services rendered to your household members.
- Make records everyday (in order not to forget anything), as clearly, exactly and in details as possible;
- Use additional pages given at the end of the diary if the allocated area is not enough for notes. Indicate the day to which the note is applied for in the corresponding box.
- Do not fill the code box. To be filled at National Statistics Office of Georgia

### Table 1

- Write down everything you brought home at indicated day, purchased as well as harvested from your own land; items obtained as gifts or as humanitarian assistance for own consumption as well as for selling (in case of own production), for cattle feeding (in case of own production) and for processing
- Write down a detailed description of each item. For instance, do not write down "meat", instead of it specify and write down "beef", "mutton"; Do not write "flour", specify and write "wheat flour", "maize flour", etc.
- Choose and encircle the unit of measurement, which is the most convenient for you. If you bought the product through retailing, try to evaluate the amount of grams or milliliters in each unit;
- If the product is purchased, write down how much GEL have you paid for it
- Please, indicate the origin of the product: encircle whether it is own production, obtained for free or as humanitarian assistance or bought. If it is purchased, encircle where it was purchased;

- Please, indicate the purposes of each product: Encircle whether it is for own consumption, selling (in case of own production), cattle feeding (in case of own production) or proceeding;
- If you have gathered your harvest during the coverage week, approximately identify and write down separately what share of whole harvest is foreseen for own consumption in the primary form, selling (in the primary form as well as after processing), cattle or poultry feeding and proceeding (in case if household is going to consume the products received);
- Do not write down the products foreseen for a party

## **Table 2**

- Write down the information on the expenses made by your household member(s) for catering outside the home (in a canteen, café, street, job, etc.) in this table;
- If your household member had dinner with others and he paid the whole cost of the dinner, enter this expense into the table as well.

## **Table 3**

- Describe non-food goods and services as clearly and in details as possible.
- While writing down expensive goods (automobile, furniture, refrigerator, TV set, etc.) do not miss minor non-food items such as newspaper, soap, toothpaste, cream, needle, matches, kerosene, etc.;
- In case of drugs, please point out its name by all means; in case of cigarettes – indicate whether it is with a filter or not, or whether it is tobacco.
- In case of clothes, please point out whether it is for a woman, man or child (write down the child's age as well), whether they are for summer, winter, spring or autumn clothes.
- In case of transportation, please point out what kind of transport you have used: bus, mini-bus, taxi, underground, train, plane, etc.
- While writing down the services, please, point out in the “Amount” space, how many times you have used these services that day
- Please point out the origin of non-food products and services: encircle whether they are obtained for free or as humanitarian assistance or purchased;
- While recording dairy, Please use the samples given on the next pages as a guide, where the records of various kinds of goods and services are given

Fourth day	Indicate the day of a week	
<b>Expenditures on food products bought for consumption in the household:</b>	Bought: in the shop - 2 loafs of bread, 500 gr each, paid GEL 2.40; at the market – 2 kg beef, paid GEL 44; 200 grams of greens, paid GEL 2.50;	
<b>For feeding of domestic animals:</b>	5 kg maize produced in own land was used for feeding chickens;	
<b>Products of own production (or bought or received free of charge)</b>	Household produced 1 ton grapes. 50 KG of this amount household consumed in the form of grapes and 950 KG is going to proceed for producing the wine;	
<b>Obtained free of charge:</b>	10 kg beans sent from the village;	
<b>For catering outside of home:</b>	One household member invited his/her two friends to cafe and spent GEL 30;	
<b>Non-food expenditures:</b>	Bought: in the street - a pack of cigarettes, paid GEL 7; at “bazroba” – winter shoes for a two years old child, paid GEL 50; Three household members took a minibus 2 times inside the town, paid GEL 6; Bought 10 liter of petrol for the car, paid GEL 30; paid GEL 9.60 for one month's water supply charge; obtained free consultation from a doctor being his acquaintance; bought 1 strip of antibiotics, paid GEL 21.	

**1. Food - purchased, grown on a private land or obtained in a different way, brought home for the purpose of own consumption (including processing and storage), selling or forage (in the case of own production)**

**To an interviewer:** While keeping the diary, be more precise about the following things: how completely are the data written in the diary in compliance with the real expenditures of household. Namely, by asking each household member, specify whether they had additional expenditures during the past 7 days that are not included in the questionnaire. Pay special attention to those expenditures that are made outside the home. For example, expenses on tobacco, petrol, restaurant and pub services, etc. In order to avoid double counting, before entering data into the table below, make sure that those expenses are not already included in the tables above.

Personal Expenses				
Tick off the box by <input type="checkbox"/> and move to the next table, if you have nothing to write here				
Code	The number of the household member from Shinda02	Food and non-food goods and services (describe as clearly as possible)	Expenses of the last week, total	
			GEL	Tetri

# Personal Expenses

Tick off the box by **V** and move to the next table, if you have nothing to write here

Code	The number of the household member from Shinda02	Food and non-food goods and services (describe as clearly as possible)	Expenses of the last week, total	
			GEL	Tetri

1. Was any household member absent the whole night during these seven days (including temporarily absent members)? – **encircle**

1 = Yes  
2 = No

Calculate and write down total number of the man-days of absence from dwelling during these seven days if the answer is “Yes”;  
Move to the next question if the answer is “No”.

Total number of the man-days of absence	
---	--

*Example: If a household member was absent during three nights and two another members were absent for two nights each, then the total number of the man-days of absence should be calculated in the following way: (1 member x 3 days) + (2 members x 2 days) = 7 man-days.*

2. How many persons have you treated in your household during these seven days? (Please, calculate the number of man-dinners according to the example) (Parties are not included)

Estimate in GEL

3. How many times have your household members been treated by their friends, relatives or others in their families, canteens, cafés, etc. during these seven days? (Number of man-dinners)

Estimate in GEL

*Example: If two household members had dinner 3 times and another one had dinner four times during these 7 days, the total number of man-dinners should be calculated in the following way: (2 members X 3 dinners) + (1 member X 4 dinners) = 10 man-dinners*

4. Have you given any food-stuffs to your friends, relatives or others during these seven days? (from the food you have brought home for own consumption)

1 = Yes  
2 = No

Please, write down the name and amount of products if the answer is “yes” (for example, 6 eggs; a bagful of peaches, about 5 kg)

4.1. Code	4.2. The name of food-staff you gave to others	Measurement unit (encircle)				4.3. The amount of products in kg, liters or units	4.4. If amount is in units, write down how many grams or milliliters is an unit
		kilogram	gram	liter	unit		
		1	2	3	4		
		1	2	3	4		
		1	2	3	4		

5. Subjective assessment of the interviewer:

How reliable is the information given by the respondent?

- 1.
- 2.
- 3.
- 4.

The interviewer's comments and notes:
