07.10.2026

In August 2026 the Construction Cost Index (CCI) decreased by 0.8 percent **compared to the previous month**. The change was mainly due to a 6.5 percent decreased in average monthly nominal wages of employees in the construction sector, which contributed -1.42 percentage points to the total index change.

Compared to August 2025 the CCI increased by 3.4 percent. The latter was largely caused by the 19.7 percent increase in the cost category of transportation, fuel and electricity and by the 0.8 percent increase in prices of construction materials, which contributed 2.31 and 0.48 percentage points to the total index change, respectively. Along with this, the Construction Cost Index posted a 29.2 percent increase **compared to February 2022**.

The following table presents the CCI in August 2026, compared to the previous month and the same month of the previous year, as well as the contributions of cost categories and segments to the total index.
