Georgian railway

2026, III quarter

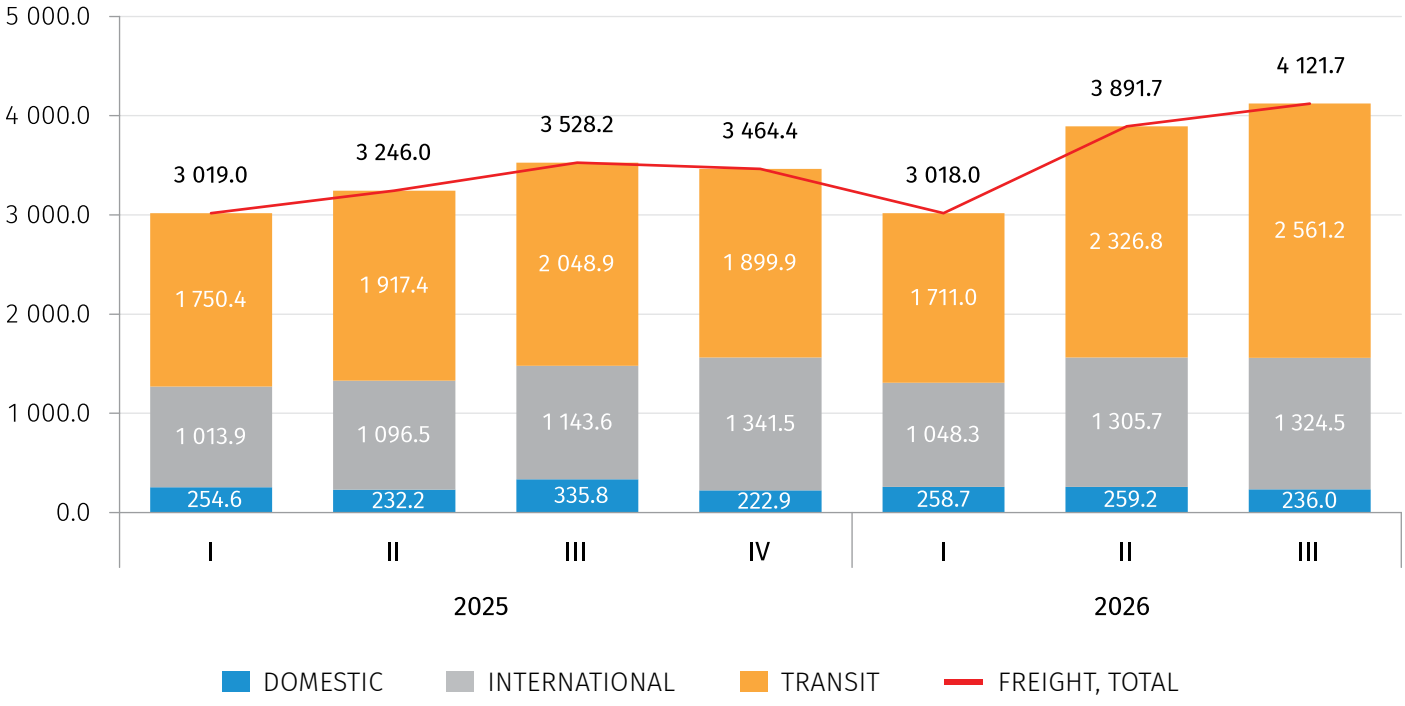

19.11.2026

MAIN INDICATORS OF RAILWAY
(2026, III QUARTER)

In the III quarter of 2026, rail transported 4.1 million tons of freight, which is 16.8 percent more than the respective figure of the previous year. 5.7 percent of the total freight was transported domestically, 32.1 percent was transported internationally (excluding transit), and 62.1 percent was transit.

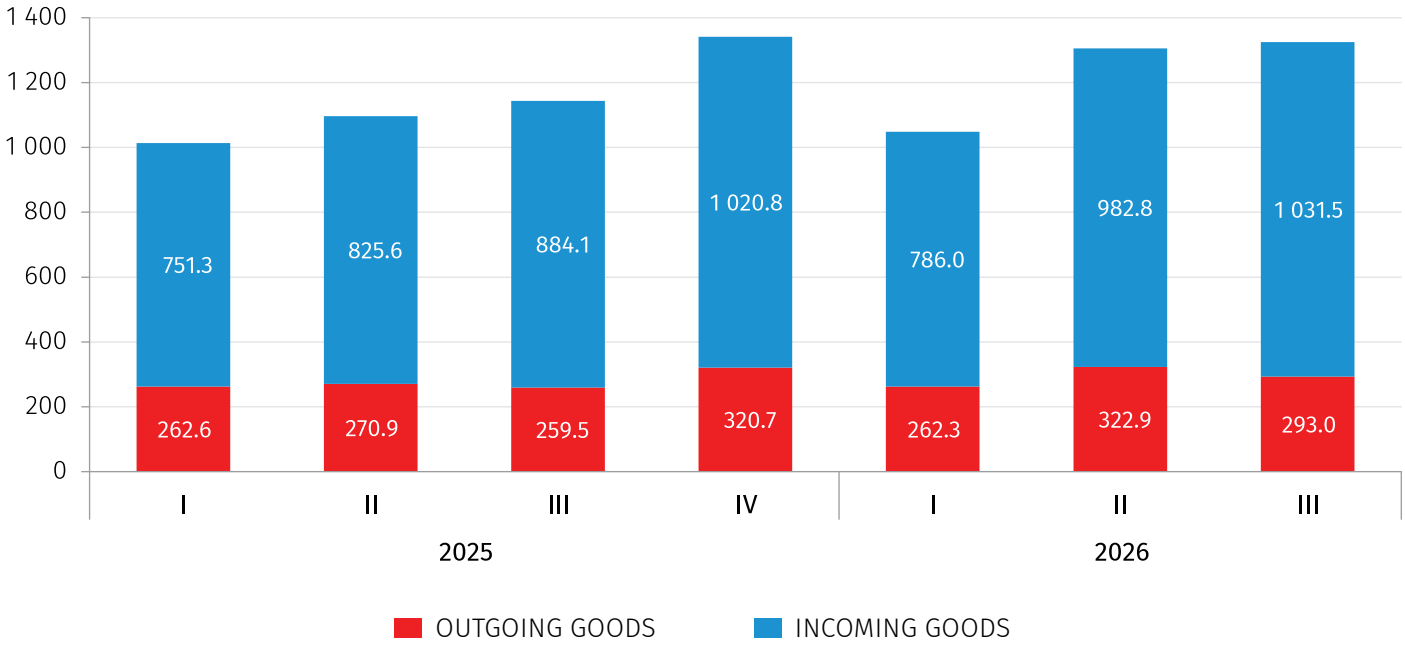

RAILWAY TRANSPORTED FREIGHTS BY TYPE OF TRANSPORT
(THOUSAND TONS)

In the III quarter of 2026, the share of incoming freight represented 77.9 percent of the railway-transported freights, while the share of outgoing freight was 22.1 percent.

The chart below shows the structure of internationally transported freights by quarters:

STRUCTURE OF INTERNATIONAL TRANSPORTED GOODS
(THOUSAND TONS)

In the III quarter of 2026, the sender country of 22.2 percent of total incoming rail freight was Russian Federation, 22.1 percent was sent by Azerbaijan. The share of other countries sending cargo was less than ten percent each (55.7 percent combined).

In the III quarter of 2026, Armenia was the final destination for 24.4 percent of total outgoing freight, for 8.0 percent – Kazakhstan, for 7.0 percent it was Russian Federation. The share of other individual receiving countries was relatively small (60.6 percent combined).

In the III quarter of 2026, the breakdown of the total transit freight[1] by the final destination country was as follows: the Turkey – 9.2 percent, the Netherlands – 8.3 percent, China – 5.7 percent, Italy – 1.8 percent, Ukraine – 1.1 percent, Romania – 0.7 percent, and elsewhere was for the rest. In the same period, Brazil was the sender country of 4.8 percent of the total transit freight, Turkey – 3.9 percent and other countries sent the rest.

In the reporting period, 34.7 percent of the total freight were coke and refined petroleum products, 21.5 percent were chemicals, chemical products, and man-made fibers; rubber and plastic products, and 11.5 percent were food products, beverages and tobacco.

[1]Due to the data confidentiality purposes, the indicators of the volume of shipments carried out from/to particular countries is not given.

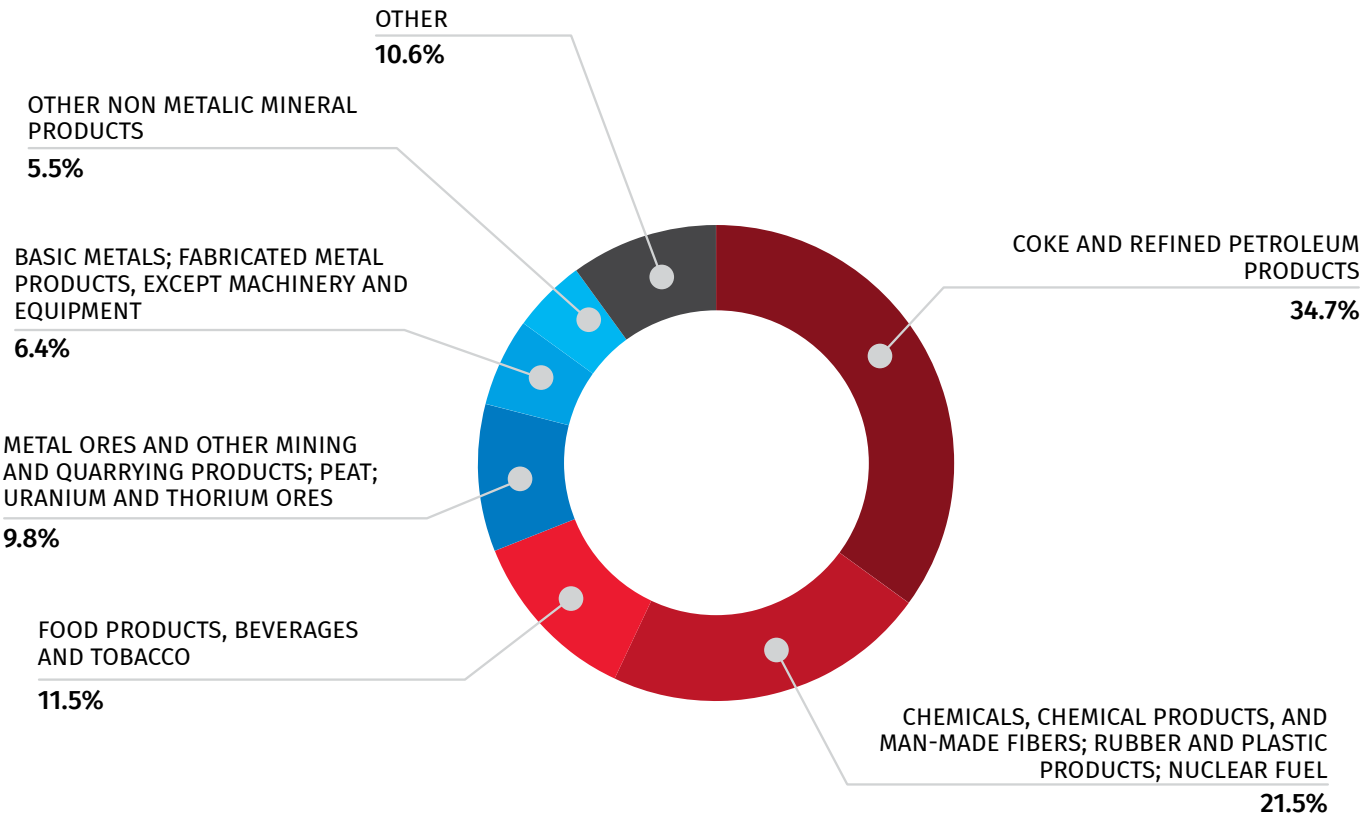

The distribution by type of goods was different in case of freights transported domestically in the III quarter of 2026, as the share of metal ores and other mining and quarrying products equaled 61.4 percent of total, and the share of transport equipment amounted to 15.8 percent; while the share of coke and refined petroleum products amounted to 14.8 percent.

As for the freights transported internationally, in the reporting period, incoming goods were mainly coke and refined petroleum products (47.3 percent), other nonmetallic mineral products (13.7 percent), food products, beverages and tobacco (7.9 percent), metal ores and other mining and quarrying products (7.8 percent), coal and lignite; crude petroleum and natural gas (7.7 percent), basic metals (6.5 percent), chemicals, chemical products, and man-made fibers (2.5 percent), products of agriculture, hunting, and forestry (2.5 percent), wood and products of wood and cork (1.8 percent), and machinery and equipment (1.0 percent); while outgoing goods were mainly food products, beverages and tobacco (25.8 percent), chemicals, chemical products, and man-made fibers (24.9 percent), other nonmetallic mineral products (16.4 percent), metal ores and other mining and quarrying products (12.6 percent), and basic metals (12.5 percent).

In the III quarter of 2026, three type of goods, namely coke and refined petroleum products (35.0 percent), chemicals, chemical products, and man-made fibers (30.8 percent), and food products, beverages and tobacco (12.4 percent) constituted for 78.2 percent of the total volume of transit freight.

The chart below shows the structure of rail-transported goods in Georgia by type in the III quarter of 2026:

STRUCTURE OF RAILWAY-TRANSPORTED FREIGHTS BY TYPE OF GOODS

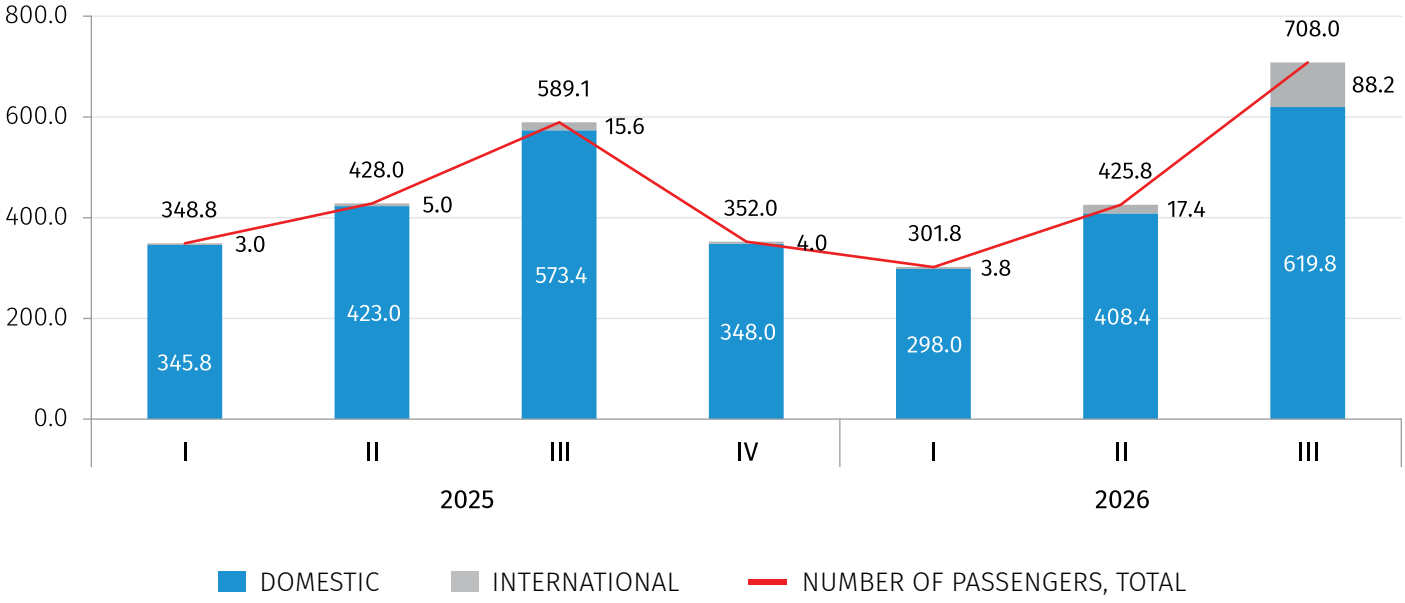

In the III quarter of 2026, the number of passengers transported by the Georgian Railway increased by 20.2 percent compared to the corresponding period of the previous year and amounted to 708.0 thousand persons. At the same time, passenger turnover increased by 13.6 percent and amounted to 164.5 million passenger-kilometer.

In the III quarter of 2026, the number of passengers transported within the country amounted to 619.8 thousand persons, which represents 87.5 percent of the total number of passengers carried and is 8.1 percent more than the same figure of 2025. At the same time, the number of passengers transported internationally amounted to 88.2 thousand, which is approximately 5.6 times more than the corresponding figure in the previous year. For internationally transported passengers, embarkation from Azerbaijan accounted for 35.5 percent, embarkation from Armenia accounted for 12.6 percent, disembarkation to Azerbaijan accounted for 36.8 percent, and disembarkation to Armenia accounted for 15.1 percent.
